#### **DETAILED ACTION**

### Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/1/05 has been entered.

# Response to Arguments

2. Applicant's arguments filed 11/1/05 have been fully considered but they are not persuasive.

Applicant argues that Aotake fails to disclose or teach that the recording interface and the reproduction interface each display a recording button through which orders may be input for operating the recording unit and a playback button through which orders may be input to operate the reproducing unit. Examiner disagrees.

Applicant is referred to Fig.7 which displays the recording interface and the recording button 309 which is operated to start a recording operation at which time the word "REC" is displayed on the recording indicator field 302 (see col.23, lines 38-50); and Fig.15 which displays the reproduction interface, and the reproduction button 347

which is operated to start a reproduction operation at which time the word "PLAY" is displayed on the playback indicator 343, indicating that the playback operation is underway (see col.35, lines 9-25 and col.36, lines 13-20).

# Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 1-7&25 are rejected under 35 U.S.C. 102(e) as being anticipated by Aotake (US 6,411,771).

Regarding claim 1, Aotake discloses a picture processing apparatus/method, and a recording medium being capable of carrying out search of a desired scene with ease, comprising:

- a) recording unit configured to record a first supplied picture (see Fig.5, col.8, lines 19-55; col.23, lines 38-51);
- b) reproducing unit configured to reproduce a second recorded picture (see col.35, line 9-25);
- c) display controlling unit configured to provide display control in such a manner as to display a first user interface when the recording unit records the first picture

Application/Control Number: 09/556,949

Art Unit: 2616

supplied (see col.23, lines 38-51) and to display a second user interface wherein the reproducing unit reproduces the second picture recorded (see col.35, lines 9-25);

d) wherein the first and second user interfaces each display a recording button through which to input orders for operating the recording unit (see Fig.7; recording button 309; col.23, lines 38-51), and a playback button through which to input orders for operating the reproducing unit (see Fig.15; playback button 347; col.36, lines 13-20).

Regarding claim 2, Aotake discloses wherein the recording means records simultaneously at least one picture making up the first picture (see col.35, lines 38-52), here the word "REC" is displayed to indicate that the recording process is going on at the instant

Regarding claim 3, Aotake discloses wherein the reproducing means reproduces simultaneously at least one picture making up the second picture (see col.35, lines 16-25), here the word "PLAY" is displayed to indicate that the reproducing process is going on at the instant

Regarding claim 4, Aotake discloses wherein the display controlling means provides display the same position (see col.39, lines 15-22 and col.8, lines 33-36), here Aotake discloses that in the shared mode, the MPEG1 real time encoder board 213 is allowed to write (control in such a manner that the first and second user interface appear in substantially record) an MPEG system stream into the MPEG file, and, at the

Art Unit: 2616

same time, the MPEG1 software decoder 201A is allowed to read out (playback) the MPEG stream as well. And following the processes of recording and playing back discussed above, when the recording and playing back processes are executed at the same time, in the shared mode, the first screen (slip recorder main window 301 of Fig.7) and the second screen (playback window 341 of Fig.15) will appear substantially the same poison.

Regarding claim 5, Aotake discloses wherein the display controlling means displays the first user interface in such a manner as to place a first and second display thereof into a first and a second state respectively, the first display in the first state accepting an input of orders via a recording button for operating the recording means, the second display in the second state accepting an input of orders via a playback button for operating the reproducing means, the display controlling means further displaying the second user interface in such a manner as to place the first and second display thereof into the second and the first state respectively, the first display in the second state accepting an input of orders via a recording button for operating the recording means, the second display in the first state accepting an input of orders via a playback button for operating the reproducing means (see claims 2&3 discussions above), here examiner reads the first state as the recording state and the second state as the reproducing state.

Page 6

Regarding claim 6, the claimed limitations of claim 6 are accommodated in the discussions of claim 1 above.

Regarding claim 7, the claimed limitations of claim 7 are accommodated in the discussions of claim 1 above., including the claimed medium, which examiner reads as a recording medium (see Fig.5, and the main memory unit 202; col.8, lines 55-63).

Regarding claim 25, the claimed limitations of claim 25 are accommodated in the discussions of claim 1 above.

### Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Onuaku whose telephone number is 571-272-7379. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Groody can be reached on 571-272-7950. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
